# Bank Management Application Screenshots

Problem Statement : In this web application, Customer will apply for loan depending on types of loan i.e. Education loan,Personal loan,etc. Depending upon status of customer, Ban manager will approve his loan request.
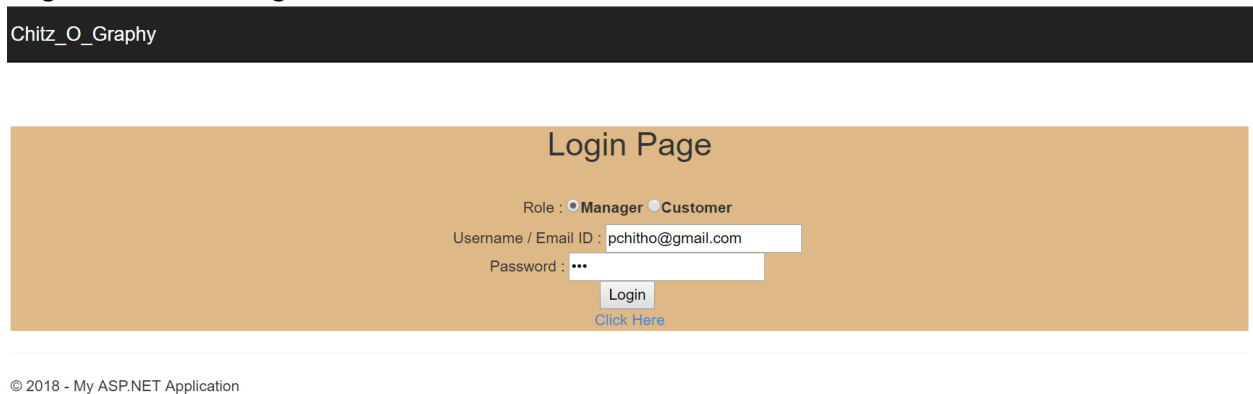

This app is developed using ASP.Net and MVC .

Step 1 : Sign up page based on Manager and Customer.

Step 2 : After Sign up, It will redirect to Login page.

Login Details of Manager

Login details of Customers:

Login Page
